SUMMARY

Senior Full Stack Developer with 4+ years of experience delivering 25+ web apps and 5 MVPs that accelerated product validation by 50%. Completed 48 self-employed projects with a perfect 5-star client rating. Scraped 800K+ leads to boost outreach by 60% and improved delivery speed by 50% through DevOps.

SKILLS

Frontend & Backend: React, Next.js, TypeScript, JavaScript, Node.js, Express.js, NestJS, Laravel, REST APIs, GraphQL
Database & Cloud: MongoDB, PostgreSQL, AWS (EC2, S3), Docker, CI/CD, Nginx, PM2, Git, GitHub, DigitalOcean
Methodologies & Tools: Agile, Scrum, API Development, Microservices, Tailwind CSS, Storybook, Cursor AI

WORK EXPERIENCE

Swiss Strategic Development Group AG - Zurich, Switzerland

February 2025 - Present

Senior Software Engineer

Remote

- Developed 4+ full-stack sites using Next.js and Three.js, and designed reusable UI libraries for consistent UX.
- Integrated Stripe and Zapier into Next.js apps, cutting manual ops by 50% and streamlining global payments.
- Scraped 4+ sites, extracting 800K+ leads via Python and Node.js, boosting outreach efficiency by 50%.
- Built DevOps pipelines and VPS with Docker, GitHub Actions, Nginx, and PM2, ensuring 99.9% uptime.

Tomorrow's Intelligence - London, United Kingdom

April 2023 - February 2025

Software Engineer II & Business Enablement Specialist

Remote

- Delivered 10+ PWAs with MERN stack, optimized for all devices, tripling user reach, and achieving sub-2s load times.
- Authored 14+ SRS docs and technical briefs, aligning cross-functional teams and reducing revisions by 40%.
- Engineered role-based auth, short-form video feature, and CI/CD pipelines, increasing DevOps velocity by 70%.
- Created 20+ technical/business presentations, driving 40% sales growth and enhancing client pitch outcomes by 90%.

Hypercent - Bucharest, Romania

February 2022 - April 2023

Full Stack Developer

Remote

- Built full-stack sites with Next.js, TypeScript, Stitches, Radix UI, and Tailwind CSS, including unit tests.
- Refactored an Nx monorepo with NestJS API, 3 frontends, and shared UI library, boosting reliability by 20%.
- Implemented a secure crypto wallet Chrome extension using React, Vite, and Stitches; integrated with backend API.
- Designed a UI component library in Storybook, ensuring design consistency across 3 projects.

Self-Employed - Islamabad, Pakistan

February 2021 - February 2022

Full Stack Developer

Remote

- Delivered 13+ web apps for global clients, building trust through transparent communication and consistent delivery.
- Fixed 20+ bugs and refactored codebases, enhancing structure and boosting team efficiency by 40%.
- Deployed end-to-end apps on AWS, DigitalOcean, and Google Cloud, ensuring zero-downtime and fault tolerance.
- Taught MERN stack development to 100+ students via recorded lectures, assignments, and personalized feedback.

EDUCATION

University of Engineering & Technology Mardan

August 2019 - July 2023

BSc in Computer Software Engineering

Relevant Coursework: Web Engineering, Software Requirements Engineering, Data Structures & Algorithms, Database Systems, Artificial Intelligence, Big Data Analytics, Mobile Application Development.

PROJECT WORK

AuthentiChain: Engineered a blockchain-based system on BSC using ERC-721, MetaMask, React, Node.js, and Solidity to fight counterfeit products by linking supply chain and customer data on-chain, enhancing traceability and authenticity.
